9555353797 | Hyderabad, India | divy2113035@akgec.ac.in | [portfolio/divvy](#) | [linkedin/divvy](#) | [behance/divvy](#)

SUMMARY

Founder with hands-on 0-to-1 experience building a deep-tech water-conservation platform incubated at NSRCEL, IIM Bangalore (patent filed). Completed a 1 Year Full time & 6-month APM role in real estate growth and marketing, driving cross-functional work with Product, Sales, and Data Science. Recognitions include Samsung Solve for Tomorrow (Top 20 of 18,000+).

TECHNICAL SKILLS

Project & Workflow Management: JIRA, Confluence, Notion, Agile/Scrum, Campaign Management, Growth Marketing, OKRs, KPI Tracking, Risk Management
Data & Decision Making: PostHog, Metabase, Data Visualization, Dashboarding, Funnel Analysis, Behavioral Analytics, Heuristic Evaluation, Experimentation
Design & Research Tools: Figma, FigJam, Miro, Illustrator, Wireframing, Prototyping, Usability Testing, Experience Design, Design Thinking
Programming & Tech Stack: HTML, CSS, JavaScript, Vue.js, Node.js, Unity 3D, Git/GitHub, APIs, ML Model Integration, Automation Workflows

EXPERIENCE

ASBL – Ashoka Builders India Pvt Ltd

Associate Product Manager — Revenue & Growth

Hyderabad, India

Nov 2024 – Present

- Report directly to the Growth Head as a **Revenue PM**. Own sales and marketing product use cases inside the CRM, working across Growth, Sales, and Product to make the home-buying funnel faster for customers and more profitable for ASBL.
- Shipped **30+ features** across **56 Jira tickets**. Authored **15+ PRDs/BRDs**, ran sprint planning with engineering, growth, and sales, and kept every release on schedule.
- Built the **Campaign Tracker suite** on Metabase (Summary Sheet, Daily Report, CPL Dashboard, Google Ads Dashboard). Consolidated Meta, Google Ads, and FIM channel data into one view so the growth team can see CPL per channel without asking anyone. Cut ~10 hrs/week of manual reporting.
- Shipped an **ML-based Audience Ranking engine** (Random Forest) to replace manual campaign targeting. The model's learned weights outperformed manual audience selection by ~20% in controlled A/B tests, reducing wasted ad spend on low-converting segments.
- Launched the **Content Analytics Engine** with creative-level tagging. The growth team now tracks ROI per creative across campaigns and shifts budget toward top-performing ads without waiting for weekly reports.
- Built **3 sales-facing tools** inside the CRM: Inventory Insights Dashboard (unit availability for 50+ reps, updated live), Calling Dashboard (lead activity and pickup rates for pre-sales), and Prospect Ranking (scoring logic across 100K+ leads). Sales teams stopped guessing which buyers to call first.
- Own the **ASBL Forum**, a community platform for homebuyers across 13 Hyderabad micromarkets. Grew it from zero to **3,000 MAU** and **200 DAU**.
- Drove a **127% month-over-month traffic spike** (4.2K → 9.6K pageviews) by launching Google One-Tap social login (88% adoption), thread creation flows, and SEO fixes (schema markup, breadcrumbs, .webp images).
- Instrumented **31 custom PostHog events** to track the Forum funnel from first visit to referral conversion. Used the data to reprioritize feature work each sprint, which is what lifted engagement.

Aqua-Alert – “Fitbit for Water”

Founder — Hardware + Software Water Conservation Platform

Incubated at NSRCEL, IIM Bangalore

Dec 2023 – Feb 2025

- Built a hardware-and-app platform to track water usage, surface consumption insights, and detect leakages through real-time alerts—led a 5-member team from concept to **TRL 4** with a **filed patent**.
- Drove a research-led product process: **200 survey participants**, design-thinking workshops with 10 users, and 1:1 expert interviews—translating qualitative and quantitative insights into product direction.
- Secured incubation support from **NSRCEL (IIM Bangalore)** and **Innovation Hub UP**; raised funding to advance the platform from prototype to pilot stage.

- Won **Samsung Solve for Tomorrow 2024** (Top 20 of 18,000+ teams)—awarded **INR 10 Lakh** prize with a 4-member team. Completed a 5-day bootcamp at Samsung R&D Centers under mentorship of Avijit Singh (Samsung Industrial Designer), learning design thinking and product development from Samsung India experts.
- Co-authored **2 research papers** published at **IEEE Xplore** and **Springer (HCI India, IIT Bombay)** on IoT-driven sustainability and social design.
- Venture closed after recognizing product-market fit misalignment—solving a real problem for the wrong use case. Gained lasting clarity on PMF discipline, research rigor, and the gap between insight and execution.

Indian Institute of Technology (IIT) Hyderabad

Hyderabad, India

Research Intern – Department of Entrepreneurship and Management

June 2024 – August 2024

- Co-authored a research paper on design-led innovation in early-stage startups, presented at IISc Bangalore.
- Conducted 15+ qualitative founder interviews and applied coding methods to 20+ hours of transcripts, identifying recurring patterns in frugal innovation and startup behavior.
- Synthesized findings into actionable design-thinking frameworks for startup product development, collaborating with Prof. Jayshree Patnaik.

PROJECTS

VR Rescue-X – Disaster Response Simulator — Unity, Blender, Figma, Agile

Dec 2023

- Led a cross-functional team of 5 to develop a VR simulation tool for training NDRF personnel in CBRN disaster scenarios; designed immersive training logic projected to reduce skill-acquisition time by 40%.
- Managed the full project lifecycle—scope definition, user research with emergency trainers, sprint planning, and deployment-readiness testing.
- Implemented modular architecture for scalable training scenarios, reducing design iteration time by 35%.
- Finalist at **Smart India Hackathon 2023**; selected among top 5 teams nationally from 500+ entries.

Mercedes-Benz Climate Launchpad — Cohort Member (MBRDI Launchpad Program)

May 2024 – July 2024

- Selected as 1 of 5 national finalists for the Mercedes-Benz **Climate Tech Launchpad**, a 6-week intensive program for scalable climate solutions.
- Led end-to-end development of *Kisan Rover*, Solar-Powered Agricultural Robotic Bull - a multitasking machine improving farm productivity for small-scale farmers.
- Refined product-market fit through user persona definition and iterative MVP testing; pitched the final product to investors, domain experts, and corporate innovation teams at Demo Day.

AWARDS

ASME ISHOW India Winner (2025): Awarded \$10,000 grant as one of 3 national winners for *Kisan Rover*.

Selected to represent India on the global stage.

Samsung Solve for Tomorrow (2024): Top 20 of 18,000+ teams for *Aqua-Alert*; INR 10 Lakh prize. Fully sponsored innovation tour across Samsung R&D Centers with 5-day expert bootcamp.

Smart India Hackathon Finalist (2023): Top 5 of 500+ teams for *VR Rescue-X*, a CBRN disaster training simulator.

EO GSEA Odisha Finalist (2023): Top 10 student-founded startups; evaluated on business viability and social-impact leadership.
